Sites and Chemicals for Further Consideration.doc

Good Afternoon --

As promised, here is the revised Table X from EPA's comments discussed at the last Stormwater Technical Team Call. The new sites and/or chemicals that I added are shown in bold. The main changes involve adding the T4 sites and respective chemicals, adding OF-22B for pesticides, and adding PCB's at Schnitzer WR-384.

You will notice that the wording of the title is different from the previous title. LWG suggested this wording so that this table couldn't easily be taken out of context. We are still intending on using the table as discussed and as proposed by Kristine.

Please note that the rationale for determining chemicals for further consideration at T4 sites comes from the Attachment C-1 of Appendix C of the Stormwater Loading Methods Report, which is a memo from Ash Creek Associates to the Port of Portland regarding basin selection rationale. Chemicals for further consideration for basins were determined in two ways:

1. Specific land usage that might be related to specific chemicals (i.e., automobile storage-->metals and pencil pitch-->PAHs)
2. Elevated concentrations in sediment/soil samples as noted in that report.

Looking forward to talking to all of you next Thursday.

Subject: Next Stormwater Technical Team Meeting  
Thursday July 31st  
9am-noon

Hi Stormwater Technical Team --

During our last meeting on July 3rd, it was agreed  
that EPA would  
consider weighting of stormwater concentration  
results for the purpose  
of obtaining an aggregate stormwater concentration  
value for each  
representative land use. EPA will consider basin  
weighting by the  
following methods: basin size, flow, number  
properties draining to the  
sampling location, and impervious surface amount.

It was agreed that EPA would issue their  
recommendation in two weeks  
(July 17th) and that the Stormwater Technical Team  
would meet to discuss  
and agree on the most appropriate weighting method on

July 31.

Please confirm you can attend this call from 9am-noon  
on July 31st.
